Brighter Prospects for Coal Industry in the Pass

Request by Mine Operators for Subvention of Freight Rates to Saskatchewan and Manitoba Will Likely be Granted

District Executive Miners Send Resolution to President Asking Better Distribution

Coal Orders Spread Over Year Would Furnish Steadier Employment,
States Resolution--Present System Necessitates Relief
to Alleviate Distress of Resident Miners

Local Branch Miners' Union Executive Send Resolution to President Beaty of C. P. R.

The following letter and resolution has been sent by D. Gillespie, local secretary of the Mine Workers' Union of Canada, to President Beaty, C. P. R., relative to unemployment in the Crows Nest Pass coal mines:

Dear Sir--I have been instructed by Sub-district No. 2, Crows Nest Pass branch of the Mine Workers' Union of Canada, to forward to you for your earnest consideration the enclosed copy of a resolution unanimously adopted at a meeting of the said sub-district, held in Blairmore, Friday, Nov. 22:

"Whereas the period of time worked by the coal miners of the Crows Nest Pass mining district of Alberta is yearly becoming less, though each year a larger tonnage of coal is produced;

"And whereas it has been the practice of the coal mining companies to employ many hundreds of transient miners for a few months of the year to meet the orders for storage coal required by the Canadian Pacific Ry. from that district, with the result that those workmen employed in the mining industry permanently are not able to obtain sufficient work during the balance of the year to secure a living for themselves and their families, causing the expenditure of much money by the provincial government, municipal councils and the trade unions for relief purposes;

"Therefore be it resolved, that representations be made to the Canadian Pacific Railway Company, or whose railway system or agent of the coal miners from the coal mining district is used, asking this company to so regulate their orders for coal that the production may be spread over a longer period of the year, thus enabling those persons permanently required to man the industry throughout the year to obtain a livelihood without further having to seek relief from various sources, and failing satisfactory adjustment along lines suggested, the federal and provincial governments be requested to institute a measure of control within the industry, through the appointment

of a body similar to the present Railway Commission, under whose direction such mis-management shall be corrected."

Musical Recital Very Successful

Pupils of Miss Chardon and Mr. W. H. Moser Please Big Audience at Orpheum, Blairmore

The annual recital of pupils of Miss Madeleine Chardon, of Blairmore, and W. H. Moser, of Hillcrest, in piano-forte and violin, at the Orpheum theatre, Blairmore, crowded the house to capacity, and denoted the extent of musical education among the younger people of the Crows Nest Pass. The pupils contributed forty numbers in violin and piano-forte selections, and the Hillcrest orchestra of 35 instruments played the overture and the closing number, under the conductorship of W. H. Moser. Each of the juniors was presented with a box of chocolates at the conclusion of their performance.

The young people from Coleman who were on the program were Douglass Moore, pianoforte selection "Captain Kidd"; Voices Chorus; "Grandfather's Clock"; Marie Graham, "Austrian"; Freda Antrobis, "Trot de Cavalier". The success of the program reflected credit on Mr. Moser and Miss Chardon, and the pupils, particularly those in the advanced grades.

Guard Against Small Pox Urges Red Cross

The following is the personal experience of the writer:

A few years ago a sick man landed from his ship at a busy seaport. He was taken to the home of a relative, and died one week later, not having been seen by a doctor until just before death, when he was diagnosed as smallpox. Six weeks later all the members of that household, except one, died of virulent smallpox. The exception had been vaccinated in infancy, he had a mild attack followed by complete recovery. The disease spread rapidly, assuming epidemic form, and before it was controlled, over thirty victims died, and without exception they were unvaccinated.

Fifteen cases of smallpox were reported in Edmonton recently; they had been in contact with many people before being isolated. Known contacts were vaccinated but were those others unknown immune to infection?

Every individual has a right to his own opinion on any subject whatsoever, but has the right to impose that opinion on others or to endanger the health of the community by the practice of that belief?

Vaccination has been proved over and over again to be a preventative for smallpox. Let us defend our children from such a loathsome disease and its accompanying disfigurement.

Literature on the prevention of communicable diseases may be had free from the Red Cross Society, 407 Civic Block, Edmonton.

Jack Graham returned to Edmonton on Tuesday evening after attending the funeral of his mother. Mr. and Mrs. Charlie Graham expect to return to Lacombe at the end of the week.

Important!

The Journal Christmas number will be published on Wednesday, Dec. 18. Advertisers are advised to have their copy prepared in good time for this issue.

BUY ALBERTA MADE PRODUCTS
FOR CHRISTMAS

At this season of the year when thoughts are turning to Christmas and the exchanging of presents it would be well for the citizens of Alberta to remember the efforts of the Alberta Development Board in its campaign urging the purchase of Alberta made goods.

The merchants of the province co-operate in stocking and displaying Alberta made products. How can we expect the retailer to do his part if the consumers do not take the step in the right direction and make their purchases wherever possible of the products of Alberta's factories?

HOCKEY TALK WARMING UP

"Old Crow" has done his best to warm up the fans on hockey matters. There are mysterious rumblings as to Coleman's line-up, so that the boys must be intending to spring a surprise. The mild weather of the past few days curtailed activity, after a start being made early in the week at practising. Blairmore officials state it is impossible to arrange the league schedule till the curling club there sets the dates for the bampionship. Lethbridge is making quite a noise, so that an air of expectancy is being generated among the fans in the towns represented in the league.

The hockey club was favored with good patronage at their dance on Monday evening in the Italian hall, a very good program being furnished by Mrs. Alterman's orchestra.

Mr. Donovan, formerly of Blair-

Request of Crow Mine Operators on Freight Rate Likely to Succeed

Prospects are bright for granting a subvention in freight rates on bituminous coal from Alberta coal mines, as sought for by the principal bituminous operators of Southern Alberta in a resolution sent to the Hon. Chas. Stewart, minister of mines. The operators are asking for an allowance of a fifth of a cent per ton mile for all coal placed east of the Manitoba-Saskatchewan boundary.

There is good precedent for the granting of this request. Nova Scotia operators, who now enjoy the same rate for all coal landed at the St. Lawrence ports, have been able to build up a trade from zero, five years ago, to some 2,000,000 tons in the current year. Alberta lignite operators have also been granted special rates. The resolution is still under consideration by the department of mines, and there is reason to believe it will be entertained favorably.

LAFF IT OFF AT THE TALKING "HOTTENTOT"

"GOLD DIGGERS OF BROADWAY"

ALL-COLOR PAGEANT OF SONG

Get rid of that grouch by going to the Palace theatre to see and hear "The Hottentot." Warner Bros.' latest all-talking Vitaphone picture, which is an adaptation of the stage hit of Mapes and Collier. Edmund Everett Horton and Patsy Ruth Miller head the star cast. "The Hottentot" is without doubt the funniest racing picture ever screened. Monday, Tuesday and Wednesday, at the Palace.

O. E. S. Whiteside, George Kellogg, A. M. and Mrs. Morrison and Agent McKinnon of Coleman; J. R. Smith and W. J. Bartell of Blairmore; F. J. Donkin and Dr. Reinhold, of Bellvue, and Arthur M. Denomore, of Lundbreck, were visitors to Calgary in the early part of the week. Enter-

prise.

Nancy Welford, Winnie Lightner, Anna Pennington, Lilyan Tashman, Gertrude Short and Helen Foster play show girls in "Gold Diggers of Broadway," while other principals in the cast are Conway Tearle, William Bakewell, Kirk Lucas, Armand Kaliz, Lee Moran and Albert Gran. There is a beauty chorus of 100.

Mr. Donovan, formerly of Blair-

more, is a patient in Michel hospital.

He was injured in a car accident a couple of weeks ago when his car slid off the shelf a short distance west of Crows Nest station, his skull being fractured.

A man who was driving with him was also injured. The spot where the accident occurred is very dangerous, and some years ago a man was killed there. There has also been other accidents there.

Solving Canada's Economic Problems

A country possessed of the vast extent and great variety of natural resources which stretch east and west across Canada from sea to sea, and north and south from the international boundary line to the Pole, has a responsibility not only to its own people but to the world at large. The heritage with which nature has endowed the Canadian people is one of the richest, if indeed not the richest, on this globe. It consists of some of the greatest fisheries in the world, the greatest forests, the greatest water powers, tens of millions of acres of the most fertile agricultural lands, while hidden below the surface of the earth rocks are now being exposed which are to be extended. Millions of pounds of fish are caught in the large inland lakes in Western Canada, much of which is shipped to Chicago and New York, as well as to markets in Canada. The principal fish in these lakes are whitefish, sturgeon, trout, pickerel and tuladi.

Save, and except some of the more precious stones, and those things which are alone the product of tropical countries, Canada enjoys possession of practically everything needed to build up and maintain the great industries of this and future ages. Possession of such a storehouse of wealth imposes a great responsibility on this Dominion, but it also presents a great opportunity.

How are the Canadian people developing these enormous reservoirs of potential wealth? What are they doing with them? While the country was still young, sparsely settled, and the people comparatively poor, the trees of the forest were cut down and shipped abroad as logs, rough sawn lumber and pulpwood. But now Canada is the largest paper manufacturing country in the world, and the producer of much fine furniture.

For years Canada's great tonnage of nickel, copper and zinc ores was shipped to other lands to be refined and manufactured for use in industry; now huge refineries are being established in which these ores will be processed at home. While, owing to the enormous grain production Canada is and will long continue to be the bread basket of the world, this country has forged rapidly ahead in the industry of smelting the finest flour in ever increasing quantities into the markets of the world.

A similar story can be told of the development and use being made of other of our natural resources. There is this, however, to consider. Some of Canada's mineral wealth is of low grade, and much of its value results from the fact of its enormous quantity, as, for example, the lignite coal of the west. So, too, the large iron deposits of Ontario are difficult and expensive to work for commercial use. But we are, for these reasons, to neglect them and abandon the wealth they might bring to Canada, and lose the benefits which rightly developed they would confer upon the Dominion?

These very difficulties are a challenge to the people of Canada. They are a test as to our fitness to be entrusted with the heritage which is ours.

Up to the present time Canada has devoted too little attention to, and been too niggardly in its public expenditures, upon scientific research. Rather, as a people, we have been inclined to take the easier way and seek to protect our interests by artificial means, or been content to accept minor profits from the sale of raw products, rather than through scientific research and experimental expenditures find solutions to our problems and greater wealth for our country. This attitude is not commendable, in a young country. But that day is past! If Canada is to be true to itself,

The Dominion Government, the Ontario Government, several huge corporations, universities, and private individuals of wealth, are, in the aggregate, providing millions for research work; the most modern buildings and laboratories and the finest equipment are being provided. Already important contributions have been made, while the National Research Council has demonstrated where science is greater than tariffs and trade commissioners when it comes to developing trade. An Ottawas despatch tells how it has helped to develop the markets for its products.

Magnetic iron is found in furnaces in our piazzas here, and heat is required. It came originally from Austria, but the war gave Canada a chance and deposits in Quebec were developed. After the war Austria came back, deposits were found in California and the United States tariff was raised. Canada's market was lost to the business. The mines of the Quebec mines were sold to Ottawa, and the Government, declining to impose a tariff protection, turned the problem over to the National Research Council. The scientists of the Council developed new production methods and today manufacture in Canada what it markets back to the United States, where it commands a higher price now because of its better quality.

A similar story can be told about a Siamese brick-making plant. It was originally located in Canada, but the Hudson Bay Company stopped and Professor Worcester of the University of Saskatchewan, was assigned to the problem. He discovered a proper mixture of clays, with the result that the plant in question is now making money, has enlarged its buildings and added to its equipment, and is supplying a large proportion of certain types of brick and locomotive and tile units in Western Canada but which formerly had to be imported from the United States.

Scientific research has great things in store for a country like Canada. It costs time and money to proceed intensively. It will repeat a mistake. The Canadian people should not let it stand. They are not bad, but a sound business proposition, and prepared to support their Government and scientific bodies in largely extending the scope of such research.

Normal Period Of Married Life

Insurance Statisticians Have Worked Out Scale

Insurance statisticians, after months of research, have worked out to one decimal point the period over which newly-married couples may expect to live together—leaving out the possibility of divorce, fast becoming a major factor.

It was announced recently that a man of 33 and a woman of 30 may expect to live together 27.3 years before death, in the normal course, separating them.

A woman's expectation of life at 30 is 38.3 years; that of a man at 35 is 33.4 years. This typical couple in 33.6

per cent. of cases, it is asserted, will live beyond the 27.3 average before one of them dies; in 7 per cent. of cases, both will be dead before that age; in 15.6 the wife will have died, and in 23.6 the husband will have died.

Would Fly Across Atlantic

American Woman Aviator Hopes To Be First Of Her Sex To Make Non-Stop Flight

Miss Agnes Mills, 23 years old, well known through the south as a stunt flier, announced recently that she is planning a non-stop trans-Atlantic flight.

Miss Mills hopes to be the first woman to span the Atlantic in a solo flight. It is her intention to make the flight alone, she said.

Her home is in Tampa and she was the first woman to receive a pilot's license in the state of Florida. She recently discussed plans for the flight with Clarence Chamberlain, who flew from Roosevelt Field to Germany.

The weasel is a pure killer, destroying more animals than it can consume.

The oldest bricks were cakes of sun-baked clay.

Feet Sore? Use Minard's Liniment.

Western Canada Fisheries

Opening Of H.B. Road Will Extend Fishing Grounds In The North

With the opening of the Hudson Bay R.R. next year, new areas will be opened up in Northern Manitoba and Saskatchewan not only rich in minerals but in fish. There are numerous lakes and waterways adjacent to the new railway which will enable commercial fishing operations to be extended. Millions of pounds of fish are caught in the large inland lakes in Western Canada, much of which is shipped to Chicago and New York, as well as to markets in Canada. The principal fish in these lakes are whitefish, sturgeon, trout, pickerel and tuladi.

RADIANT GIRLHOOD

Comes Through Rich, Red Health-Giving Blood

A girl who has a full-blooded body and who eats well has the foundation of active health-life. Ability to grow well and delicate and prolonged ill-health and general weakness may be results. Many women who might think that the prime of life are too frequently sufferers of headaches, back and side aches, easily tired and breathless, because of anaemia and weakly attacked in girdle.

But fortunately there is a remedy within easy reach. Thousands of tired, weak women, who have never sought the self-help of Dr. William's Pink Pills are grateful for the way in which these pills have restored them to robust health again. These pills are a safe, effective tonic and restorer that help to make plenty of red blood that speeds up an end to anaemia. A weak girl, who is tired, weary and soon becomes brighter when this new blood courses through the system. Color comes to her cheeks and lips; her appetite is good; she sleeps well and wakes bright. The following is an example, from the becomes vital and active again. Having thousands, of which these pills have done much, to help her. Martin Kitchens I can, Ont., says: "For several weeks I was greatly distressed with pains in the back and stick headache. I had to give up my work and sit well and had a poor appetite. I had been doctoring, but I'd not get much relief. My sister advised me to take Dr. William's Pink Pills after taking six pills I felt like a new person, and will not be beaten again."

You can get the pills from your doctor. The Dr. William's Medicine Co., Brockville, Ont.

Opera Costumes Auctioned

Many Valuable Ones Were Worn By Famous Actors

Ten thousand costumes, with enormous quantities of scenery and fittings belonging to the British National Opera Company, were recently sold at auction in London, England.

There were costumes Caruso had worn. The coronation gown with which Lady Diana Cooper wore in the film "The Virgin Queen," dangled from a peg in the full pride of gold and jewels. This gown alone cost \$1,000 to make, and was marked with a reserve price of \$300.

Long Standing Asthma

Many asthmatics would no difficulty in using the part of Churchill in the latter part of November, according to J. U. Beauchemin, head of the party doing hydrographic survey work at Fort Churchill harbour and on Hudson Bay. There would doubtless be a little shore ice in the harbor in November, but he says that there would be no danger of a vessel becoming ice bound until late in the month.

Mr. Beauchemin and his party have just returned to Sydney from the Hudson Bay. It is not clear from his interview that he was including in his statement any reference to Hudson Strait. But he does contradict the report brought down from Hudson Strait by the airmen on the Untin Bowler, which was wrecked up there, that the government steamer Acadia, which carried the hydrographic survey, was stuck in the ice for several days. The vessel remained in the ice only for 30 hours, he says, and it did so purposefully for the study of ice conditions, while it could have moved out of the ice field at any time.

It is easy to exaggerate the difficulties of the northern route. There are some difficulties and the best modern methods of navigation will be used. It is as quite possible, the Hudson Strait is navigable well into November, then the route will be in quite as good a position to handle the western grain crop in the fall of the year as is the route by the Great Lakes. The port of Montreal usually closes before the end of November and it takes the grain much longer to get to Montreal than to Churchill.

Traffic on the Hudson Bay route will begin in a modest way and with the overcoming of the various difficulties a great expansion of traffic and a great future for the route may be expected.—Free Press.

Would Be Great Bon

German Claims Invention Of Pillow That Prevents Snoring

The Hamilton Spectator says that a German has invented a pillow that prevents snoring.

That should be good news for long suffering wives who have been afflicted with snoring husbands. Men, of course, have never been troubled by wives who snore, because women do not snore, they say.

How easily will solve the eternal puzzle of what to give him for Christmas. If it is more blessed to give than to receive, how good will the gift of one of these pillows not make the wife feel.

But just how the receiver of such a gift, bearing with it, as it does, the name of a German, is not very appropriate. Will readers under it in a house of which color. Because we have never yet met one who admitted that he snored, not even one who was even guilty of murmuring in his sleep.

And now, if that inventor can produce a pillow that will stop children talking or walking in their sleep, or from crying out in the night, from any cause whatsoever, what a quiet place home will be after the family gets to bed.

Attacked By Grizzly Bear

Trapper In B.C. Owes His Life To His Faithful Dog

Charged by an infuriated grizzly bear, the largest ever seen in the Barkerville country, Hans Iverson, trapper and big game guide of Indian Point Creek, Barkerville, B.C., owes his life to his dog, which held the grizzly at bay until Iverson could get his rifle, jammed at the critical moment, into action.

The day previously Iverson had killed a moose. Returning to take home the carcass, he found a huge grizzly in the act of making the dead moose into a cage, covering it with earth, moss and debris.

Before the trapper had time to uncharge his rifle the grizzly was charging down upon him. He hastily attempted to throw a cartridge into the chamber, but the rifle jammed and Iverson found himself at the mercy of the beast. It was then that his dog took the offensive, holding the bear occupied until Iverson could get his rifle in working order and killed the animal.

With all his sons "airing the air," the King may yet consider taking a trip himself, but, one feels sure, there will always have to be a satisfactory settlement of two matters before this can take place. First, without a doubt he will be accompanied by the Queen, and second he will fly only if the subjects are absolutely certain of the safety of the flight.

Saskatchewan breed Herefords, raised on the ranch of Robert Cruckshank, of Moose Jaw, Saskatchewan, took the grand championship at the Saskatchewan Annual Feeder Show in Moose Jaw recently.

The largest spiders in the world are found in New Guinea, and their web is strong that they are used as fishing nets.

Pestiferous, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

All over Canada farmers are coming to realize the great value of the birds to agriculture.

Navigation At Churchill

Port Open To Ocean Vessels Till Late In November

Ocean vessels would have no difficulty in using the port of Churchill during the latter part of November, according to J. U. Beauchemin, head of the party doing hydrographic survey work at Fort Churchill harbour and on Hudson Bay. There would doubtless be a little shore ice in the harbor in November, but he says that there would be no danger of a vessel becoming ice bound until late in the month.

Mr. Beauchemin and his party have just returned to Sydney from the Hudson Bay. It is not clear from his interview that he was including in his statement any reference to Hudson Strait. But he does contradict the report brought down from Hudson Strait by the airmen on the Untin Bowler, which was wrecked up there, that the government steamer Acadia, which carried the hydrographic survey, was stuck in the ice for several days. The vessel remained in the ice only for 30 hours, he says, and it did so purposefully for the study of ice conditions, while it could have moved out of the ice field at any time.

It is easy to exaggerate the difficulties of the northern route. There are some difficulties and the best modern methods of navigation will be used. It is as quite possible, the Hudson Strait is navigable well into November, then the route will be in quite as good a position to handle the western grain crop in the fall of the year as is the route by the Great Lakes. The port of Montreal usually closes before the end of November and it takes the grain much longer to get to Montreal than to Churchill.

Chilblains & Frost-Bite

A remedy for those most troublesome of Winter complaints, chilblains, frost-bites, etc.

Zam-Buk is speedily effective. It takes away inflammation and reduces swelling in a wonderful way and soothes the fiery tingling irritation.

Where the chilblains are broken and have a raw sore, Zam-Buk is doubly valuable because of its great healing power. Its pain-killing efficiency and its fine antiseptic properties place Zam-Buk far above ordinary ointments.

Zam-Buk
SOOTHES & HEALS

Flying Interests Royalty

Prince and His Brothers Are Keen About Aviation

The fact that the Prince of Wales has appointed a regular air pilot among his retinue draws attention to the remarkable keenness shown by the Prince for flying. It is some years since he went for his first flight, but ever since that memorable occasion he has exhibited extreme alacrity.

Such attention has been given to the air pilots of the Prince of Wales, however, that most people are unaware that one of his brothers has been a fully-qualified pilot. The Duke of York is a group captain in the Royal Air Force, and as such commands the entire control of an aeroplane. He is also an aide-de-camp to his father, the King, says a writer in "The Daily Express," London, England.

The Duke of Gloucester made his first flight recently, while Prince George has flown on several occasions although not in a small machine. He has made two cross-Canada trips in an Imperial Airways liner, travelling incognito and accompanied by an equerry.

With all his sons "airing the air," the King may yet consider taking a trip himself, but, one feels sure, there will always have to be a satisfactory settlement of two matters before this can take place. First, without a doubt he will be accompanied by the Queen, and second he will fly only if the subjects are absolutely certain of the safety of the flight.

Saskatchewan breed Herefords, raised on the ranch of Robert Cruckshank, of Moose Jaw, Saskatchewan, took the grand championship at the Saskatchewan Annual Feeder Show in Moose Jaw recently.

The largest spiders in the world are found in New Guinea, and their web is strong that they are used as fishing nets.

Pestiferous, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

Needless Pain!

Don't be a martyr to unnecessary pain.

Lots of suffering is, indeed, quite needless.

Headaches, for example. They come with a bang, but one can always be prepared.

Aspirin tablets are popular pain-killers.

Keep a bottle of them at the office.

Carry the small tablet in your pocket.

Then you won't have to hunt a druggist, or wait till you get home.

And do not think that Aspirin is only for headaches.

Read the proven directions for relieving neuralgic, neuritic, rheumatic, and other aches and pains.

Remembering, of course, that Aspirin is not a cure, but a pain-killer.

For continued pain, see a doctor.

Purchase genuine Aspirin. Protect yourself by looking for that name. Always safe. Never hurts the heart.

W. N. U. 1813

Prospecting In the West

Large Number Of Claims Staked and Recorded During Past Year

Some idea of the amount of prospecting being done in Manitoba and northern Saskatchewan may be obtained from the number of claims staked and recorded during the past year. In 1928 there were 7,335 mineral claims recorded in the Pasminning district, 1,400 in the Cold Lake district, and 2,118 in the Winnipeg district. There are at present over 20,000 mineral claims recorded in Manitoba and northern Saskatchewan.

Pains Around Heart Weak Spells Would Fall Over

Mr. James Vanastine, Fibroch, Man., writes: "I had pains around my heart, and suffered with weak spells. I consulted a physician. I would fall over and would have to be picked up and put to bed. I used several boxes of

**MILBURN'S
HEART
AND
NERVE PILLS**

and it is now over three years since I have had a spell."

"I hope anyone who is in the same condition will be given H. N. Fills a fair trial."

Fill's is a box at all drugstores and dealers, and mailed direct on receipt of price by The T. M. M. Co., Limited, Toronto, Ont.

Jape Erder Thrillers'

Detective stories are the best sellers in Japan now. Their nation's tastes have turned from romance and fiction to thrillers in the form of detective yarns. This type of novel has sold to as high as 300,000 volumes and the translators of foreign crime and police action are said to be reaping fortunes.

Devastating Dialogues: "Give me lots of her remarks," said the magistrate. "They were girt terrible," replied the constable.

The pole star is always directly over the North Pole.

ASPIRIN

TRADE MARK REG.

PAINTS A VIVID WORD PICTURE OF NORTHLAND

Toronto.—A vivid word picture of Canada's new northwest development and a vision of great strides in transportation by air, land and sea that would centre about Churchill in northern Manitoba, marked the address of John W. Dafeo, managing editor and vice-president of the Manitoba Free Press, before the Empire Club here.

Speaking at the club luncheon at the Royal York Hotel, Mr. Dafeo told of new developments in Canadian transportation through the utilization of the northwest passage. With Churchill as the terminus of the new water route, saving in freight rates and distance would be effected and the bonds of empire more closely drawn together.

With the growth of the great northern artery stretching westward to the Pacific as new discoveries in air transportation rapidly follow one another, he foresees a net work of air lanes leading to Europe and Asia with Churchill as the greatest junction point on the North American continent. As direct results of the new water route, Mr. Dafeo visioned mighty shipments of grain moving through the northwest passage to the old world and return cargoes of Welsh anthracite coal that would find ready markets 500 miles from Hudson Bay and would eliminate importation of Pennsylvania anthracite.

Resumption of Canada's cattle trade with Great Britain, he stated may be brought about by the new route, where there would be savings of 1,200 miles as against the old route. "We have lost our cattle trade with Great Britain," he said, "and we may be shut out of the United States."

All importations into western Canada, he pointed out, could come via the new route to the carrying capacity of that route during the season. Great developments would also be effected in the Peace River district, "which will be nearer Liverpool by the new route than via the Pacific."

Named For Cattle Judging

Three Farm Boys To Represent Canada In Great Britain Next Summer

Toronto.—Three young farm lads, holding high aggregate scores in the cattle club contests of the Canadian National Railways at the Royal Winter Fair, have been selected to represent Canada next summer in the international cattle judging contest to be held in Great Britain in which they will compete from teams all over Britain and from the United States.

The successful boys, Clifford Baldwin, Barric, Ont.; Cedric Kirkpatrick, Virgil, N.B.; and Gordon Campbell, of Stewiacke, N.S.

British Cadets Coming

Will Attend Annual Meet In 1930 Of Canada Rifle Association

Ottawa—Cadet contingents from Great Britain will attend the annual shoots in 1930 of the Dominion of Canada Rifle Association and the Ontario Rifle Association, it was announced in a letter received by the Department of National Defence from Surgeon-Captain R. J. E. Hanson, honorary organizer of the Imperial Cadet Association.

The contingent of 19 cadets will be headed by Major J. M. West, Shrewsbury Officers' Training Corps, as honorary commandant.

Ask For British Control

Apia, British Samoa.—A petition requesting the King of England to take the control of Samoa from New Zealand, and to give it directly to England, was lodged with the administrator here for transmission. The petition was signed by 23 chiefs in behalf of the "Mau" organization of natives, which represents about 95 per cent of the Samoans.

Oppose British Barracks

Wellend, Ontario.—A battalion of French infantry has arrived here and taken over the barracks recently occupied by the British troops of occupation. Despite statements to the contrary, some quarters believed that the French intend to send detachments of troops to various places in Britain's former area of occupation.

Logging In B.C. Curtailed

Victoria—Drastic curtailment of logging operations is being effected at most Vancouver Island camps, in concert with the reduced activity generally throughout Oregon, Washington, and British Columbia. The report was adopted.

Good Market For Wheat

Britain Will Purchase Grain Stored In Canada Says Expert

Toronto.—"In light of my experience in England and from reports I have received concerning the wheat supply in other countries, I see no reason why the millions of bushels of Canadian wheat at present in storage should not be sold at satisfactory prices before next year's yield," said W. A. Wilson, Canadian agricultural representative in London, England, upon his arrival here from the Old Country.

With an intimate knowledge of the wheat situation, Mr. Wilson did not hesitate to say that in his opinion the time had come when Canadian wheat, at present filling the giant elevators at different points throughout the West, would move toward the great British market.

The Canadian agricultural representative declared that statistics had been able to gather on the wheat supply throughout the world all pointed toward big purchases of Canadian wheat before the 1930 crop.

Royal College Of Physicians

Sixty Leading Figures In Canadian Medicine Meet At Ottawa

Ottawa.—The Royal Canadian College of Physicians and Surgeons came into being when 60 leading figures in Canadian medicine met here. The royal college was provided for at the last session of parliament, and has as its purpose the foundation of a standard of specialization in the medical profession. Toronto was chosen as the headquarters of the college.

Officers were elected as follows: President, Dr. John C. Meakins, Montreal; vice-presidents, Dr. F. G. Starr and Dr. Duncan Graham, both of Toronto; reg'trator-secretary, Dr. T. C. Rotley, Toronto.

The original charter fellows are entitled in the act of parliament establishing the college to comprise university professors in medicine in the nine medical schools in Canada. About 60 of these were present and were sworn in.

Heavy Air Mail

Thousands Of Letters Are Awaiting Opening Of Northern Service

Edmonton.—One hundred thousand letters are at the central post office in readiness for the opening of air mail service to the north country, it was estimated by F. X. J. Leger, superintendent of the Edmonton post division, a few days ago. The peak has not been reached yet as more flight letters are being received daily.

The machines will be all likelihood required for opening this service. Two of these would extra aeroplanes for handling the large volume of letters sent here by first flight cover collectors.

Nothing definite has been settled as yet in regard to the date of opening the northern service, as this will start just as soon as there is sufficient ice on the rivers for the machines to land on skis.

Wolves Invade Moscow

London, England.—An invasion of hordes of wolves in the crowded suburbs of Moscow was described in a Daily News despatch from the Soviet capital. The despatch said that the wolves had attacked adults and children and had devoured two small children. Moscow's suburbs recently have been overcrowded with peasants who have set up temporary homes while awaiting permission to migrate to Canada.

Sale Of Coal Discussed

London, England.—Right Hon. J. H. Thomas informed the House of Commons that he had had a number of other discussions with coal and shipping interests concerning the sale of British coal to Canada. These had raised a number of questions which would require careful consideration and consequently he could make no further statement at present.

Would Shorten Working Hours

Winnipeg.—The Dominion was requested in a resolution sent by Mayor Dan McLean, to take under consideration a plan to shorten the hours of working men in Canada. Details of the plan or to what extent the working day should be cut were not divulged. It is aimed to give employment to hundreds of men now out of work throughout the country, Mayor McLean said.

Would Retain Plant

Moose Jaw, Sask.—Recommendation to the Moose Jaw power plant to retain it as a municipally-owned utility and opposition to its proposed sale to private interests, was voiced in the report to the Trades and Labor Council by a special committee. The report was adopted.

PROBLEM FOR LEAGUE CREATED BY MENNONITES

Ottawa, Ont.—Cable advice received from Geneva, Berlin and Warsaw made clear that the exodus of refugee Mennonites from the Soviet republic rapidly is increasing greater proportions and that while there has been no suggestion that Canada should consider taking more than 6,000 of them, the number that will have to find new homes somewhere in the world may reach the staggering total of 100,000 persons.

The 5,000 Mennonites who gathered in the environs of Warsaw a few weeks ago and concerning whom the Canadian government was approached by the German foreign office, appear now to have been but the advance guard of a constantly swelling stream of Mennonites. It is claimed that the entire Mennonite population of Russia, which has been increasing steadily for 150 years since the Great Patriotic War, will leave the republic. Within a few months upwards of 100,000 Mennonite refugees will have left Russia and will be facing starvation unless rescued by the League of Nations or the governments of Europe.

Hon. F. Nansen, the head of the refugee commission of the League of Nations, has communicated by cable with the Canadian government. He has stated that the League will intervene in aid of the homeless Mennonites and is confident that food and shelter can be provided in Europe and at the expense of the League until next spring.

This appears to remove any immediate danger of these people dying of exposure or starvation.

From what can be learned here, the Mennonites are not leaving Russia because of religious persecution but because they claim that they have been reduced from a wealthy and thriving community to starvation by the exactions of the Soviet government. Their accumulated savings in money have been confiscated and their crops, each year, have been taken from them. They claim that there was no alternative except to stay in Russia and starve or to throw themselves upon the mercy of Europe, and hope for assistance to establish homes for themselves in the western world.

As far as the immigration department here is concerned, the answer of Premier Anderson to Bishop Toews is taken as being opposed to the admission of any Mennonites into Saskatchewan other than those of those in the United States. These are under way with Manitoba and Alberta. Unless these provinces are willing to accept the Mennonites, the Dominion will decline to permit them to come.

It is felt that the League of Nations will carry the refugees over until spring and that there is plenty of time to consider very carefully the question of policy involved in bringing them to Canada.

Two Noted Authors III

Conan Doyle and Kipling Unable To Find Engagements

London, England.—Two of Great Britain's best known authors—Rudyard Kipling and Sir Arthur Conan Doyle—are in poor health.

The British Broadcast Corporation announced Kipling had cancelled a proposed radio speech December 12, because he had been ordered abroad for his health.

Sir Arthur, driven abed by over-work at his home at Crowborough, in Sussex, has cancelled all engagements for the next few months.

FLASHES GLAD TIDINGS

Ross Smyth, 22-year-old student of McGill University, Montreal, who is the wireless operator on the Fort James, who flashed back to civilization the news that the missing MacAlpine party was safe.

Over Three Millions Disbursed In Pensions

Latest Figures Show Canada Has 13,334 Old Age Pensioners

Ottawa.—On September 30, the last date for which figures are available, there was 13,334 old age pensioners in Canada, made up of 7,428 males and 5,866 females. Since the inception of the old age pension the sum of \$33,890,000 had been disbursed, the federal and provincial governments sharing equally in this distribution.

British Columbia, the first province to come within the operation of the act, had 4,214 pensioners and had disbursed \$1,520,652 in pensions. Manitoba, 4,743 pensioners. Alberta, who provincial enabling act became operative on August 1, 1916, and \$14,516.

The Northwest Territories, which is exclusively a federal scheme, had one male pensioner who drew \$51.63. No payments have yet been made on account of the province of Ontario.

Alberta Election Rumor

Premier Browne Says Question Of Election Next Year Has Not Been Discussed

Edmonton.—Asked about the probability of the Alberta general elections being held in June of next year, rumoured in Calgary, Premier Browne replied that "It's nice to have matters of this sort decided for the government without its having to deal with them at all."

The premier had no further comment to make, except to say that the question had not yet been discussed by the government in any way.

The Alberta government in Alberta if it sides out as full term, need not go to the polls again until 1933, but Calgary rumor has it that it will do so next year.

Rob Quebec Bank

Montreal.—Three armed and masked men walked into the office of the Canadian Bank of Commerce at St. Christopher's, Que., about 30 miles from Montreal, tied the manager and cashier to chairs and escaped with cash estimated at \$500. The bandits, who had prepared their way by cutting telephone wires, drove off in an automobile.

Want Official Delegates

London, England.—The British government despatched communications to Italy, France and Japan urging that those governments be represented at the five-power naval conference by civilian ministers rather than delegations chosen from the armed services.

To Aid in Industrial Development

The rapid development in power projects and other engineering works at widely separated points throughout the country has created a demand for rolling stock capable of handling unusually heavy and bulky shipments such as transformers, rotors, etc.

In order to take care of business of this kind, the Canadian Pacific Railway recently put into service two depressed center all steel flat cars which were designed by the Mechanical Department and built at the Angus Shops.

These cars are 53 feet 9 inches long the height from the rail to the top of the deck is 2 feet 4 inches, and the portion which is available for loading is 22 feet 7 inches long.

The weight is 80,700 lbs, and they will carry a load of 325,300 lbs six wheel trucks with rolled steel wheels are used.

Makes Definite Change Against Communists

Cause Of Unrest In Africa Says Minister Of Justice

Pretoria, South Africa.—The definite charge that the activities of the Communist internationale are behind the widespread unrest among natives in the Union of South Africa was made in the course of a long address by Hon. Oswald Pirow, Minister of Justice.

Numerous organizations, close allied with or at least in close touch with the Third Internationale, are responsible, the minister stated, for fanning the unrest which came to a head at Durban recently, when the government was forced to raid the native compounds and arrest 600 out of 5,000 natives who had refused to pay the poll tax.

The minister also declared that unless the danger was checked strongly by the police, rioting on a large scale would be suffered within 12 to 18 months time.

Earthquake Shakes Limer

Vessel, 640 Miles Out At Sea, Receives Vibrations From Shore

New York.—The earthquake which has fled along the coast from New York to Halifax, recently also shook the liner "Olympic" 640 miles out at sea from stem to stern, her commander reported as arriving here from Southampton and Cobh.

It provided an alarming experience for the officers of the Olympic, for they did not know what had happened. They were afraid she had hit a submerged wreck and perhaps damaged her hull.

The vibration was so severe, he said, that it shook out the electric lights in the mail room. Stewards and passengers rushed to the promenade deck to find out what had happened.

PREPARE PLANS FOR 1932 GRAIN SHOW AT REGINA

Toronto—Laying their plans for the future, when the world's grain exhibition and conference will be held in Regina, Sask., July 25 to August 6, 1932, the executive and finance committees met here recently.

Under the chairmanship of Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan, the committee held a brief general discussion and announced several appointments of committee chairman and others who will aid in carrying out the extensive program. The grain conference, the first of its kind undertaken by Canada, bids fair to eclipse any similar undertaking of an international character.

Announcement was made recently that the appointment of judges for the exhibition will be along international lines.

The total prize list, official announcement of which will shortly be made, provides for all classes, an amount of \$201,500. Of this amount \$15,000 will be allotted to the spring wheat class alone, with \$2,900 the first place award.

Appointment was made recently of Dr. J. H. Gridale, deputy minister of agriculture for Canada, as chairman of the conference program. Dr. Gridale will name his own committee, which will attend to the securing of speakers, who will present papers at the conference.

E. F. Baldwin, deputy minister of agriculture for Saskatchewan, was appointed chairman of the exhibits committee, and L. H. Newson, Dominion overseer, was named chairman of the awards committee.

Ernest Rhoades, B.S.A., of the Dominion Department of Agriculture, secretary of the 1927 world's poultry congress, was appointed secretary. The position during the earlier organization was held by Dr. T. Elderkin, manager of the exhibition, who now becomes a member of the executive.

S. Latta, former Minister of Education for Saskatchewan, was named publicity director.

His Excellency, Lord Willingdon, Governor-General of Canada, has consented to act as chief patron.

The personnel of the executive and finance committee is: Hon. W. C. Buckle, Minister of Agriculture for Saskatchewan; Hon. W. R. Motherwell, Dominion Minister of Agriculture; Hon. A. P. Prentiss, Minister of Agriculture for Manitoba; C. H. Hamilton, Dominion Grain Commissioner and former Minister of Agriculture for Saskatchewan; Dr. J. H. Gridale, Deputy Minister of Agriculture for Canada; F. H. Auld, Deputy Minister of Agriculture for Saskatchewan; A. E. Whitmore, Regina; D. T. Elderkin, Regina; W. Yule, Regina; J. A. Mooney, Regina, and Ernest Rhoades, secretary.

Several Connections Between America and Europe Severed By Earthquake

New York.—Six cable repair ships were groping in the bed of the North Atlantic off the coast of Nova Scotia for cables broken by the recent earthquake along the seaboard.

Ten or more of the connections between America and Europe were severed by the upheaval among the hills and valleys of the ocean's floor.

Royal Wedding Gift

Rome.—The wedding gift of King Victor Emmanuel to Prince Humbert and Princess Marie Jose, of Belgium, will be the Chateau of Racconigi, in Piedmont, birthplace of the Crown Prince.

NOTES AND COMMENTS

Goods to the value of \$720,090,000 were imported from the United States into Canada during 1928, while the U. S. purchased from Canada goods valued at \$493,000,000. Were Canada manufacturing the greater part of the goods she now imports at least 300,000 more skilled artisans and workmen would be employed, which would mean supporting over a million more people than we now have in Canada. Can it be wondered at that many Canadians go to the United States? There is good ground for the argument that Canadian industries should be built up by a measure of reasonable protection. If we wish to make our country more prosperous than it is, then we must find more work for those who live in it, by manufacturing more of the goods that we now purchase from other countries.

Salesmanship among nations as well as among storekeepers is the way to develop business. People must be told, and not only once but continually. The price of success in business is continual vigilance. Countries, and individuals, may believe they are well known, but when it comes to selling goods, it is those who are most in the public eye to whom people turn to do business. This means a continual policy of advertising and personal effort. That is why trade commissioners are appointed, and manufacturers advertise in many countries outside of these in which their goods are manufactured. And the fellow in business in a small way can imitate with profit the methods of his more powerful brothers, right in his home town and district.

Three names are rumored for the mayoralty contest. It will be quite in order to start a guessing contest now, and run a straw vote campaign.

Passing the American silver dollar is just as bad as "passing the buck." You receive one in payment of something, or in change, and you try to get rid of it as quickly as possible by paying it to somebody else. Nobody hangs on to it a moment longer than necessary. One chap walked into a beer parlor, and tendered it in payment. The bartender took the first chance of passing it out in change to somebody else. The last man to receive it muttered something about getting rid of it, and went to a nearby barber shop, where he tendered it in payment for a shave. The barber looking for a chance to slip it over to somebody else, handed it to a customer when making change on a two-dollar bill. This party looked at it for a second, then he visited the beer parlor, and passed it over in payment for a drink, so that the bartender received his original dollar which he thought he was getting rid of. The uninformed might wonder why the anxiety to get rid of American silver dollars. The reason is because if you take them for deposit to a bank or to make a payment there, you are deducted five cents for these "cartwheels," which the cashier states cost that amount to return them whence they came, and the bank is not allowed to pass them out as legal tender.

How do these American dollars come into circulation here? Tourist traffic is the chief cause; gasoline filling stations, restaurants and other places which visitors from the U. S. frequent are the places which receive them, and from there they radiate into general circulation, until some innocent individual takes them to a bank and is charged five cents on each for his trouble.

A legacy of good deeds has a leavening influence on the community. One who has passed on to the Promise of Life Eternal with a train of kindness and lovable traits of character as a memorial to her work in the community in which she labored for over a quarter of a century, has truly accomplished something worth while, and in all truth it can be said that she left the world richer for having lived in it. The bitter wrench of parting from worldly activities cannot be denied, no matter how bright the silver lining may be beyond the cloud, but the influence of a Christian life inspires us all and sets the example which we should strive to follow. The Journal expresses the thoughts of the entire community in the passing of Mrs. Graham to her heavenly reward.

There will be three issues of The Journal following this, then Christmas will be here. Merchants contemplating arousing some interest in Christmas stocks will require to use some publicity if they are to interest the people, and there will certainly be some buying for the holiday festivities.

Sound character building should be the first aim of education. Emerson said that the things learned in school and college were not education, but the means of education. He could have added that the education thus sub-served was the unfoldment of the faculties toward the building of sound character.—Christian Science Monitor.

Ahoy For a Merry Christmas on the Bounding Main!

429

*"At Christmas play and make good cheer,
For Christmas comes but once a year."*

—Thomas Tusser, 16th Century.

Many and varied are the circumstances under which we must spend the joyful Yuletide season, with its holly, mistletoe and gifts. Time was when Christmas Eve was a happy family gathering at some big country house or fine old city mansion, but times change, and now most of us must alter our customs accordingly. In the cities, parties and small country cottage preclude large gatherings, but it is still possible for big families to be

together at Christmas time, for the 20,000-ton S. S. Duchess of Bedford to make a 16-day Christmas New Year's cruise to the West Indies leaving New York December 23, 1929. Thus families can not only be together when the Christmas bells ring out to the world, but can also travel to a warmer climate the storied Caribbean Sea—famed for its tales of pirates and plunder in days of yore. Fortunately, none of the hollowed traditions connected with the holiday season are forgotten, on the ship gets underway. Her public halls and rooms are tastefully decorated with greenery, reindeer and other appropriate plants are everywhere. And the ship's company seems imbued with the spirit of "Peace on earth—goodwill to men." Mass card parties, big open fireplaces and Christmas trees complete the picture. Holiday voyagers aboard the "Duchess" will be entertained at the Paris of the New World; Kingston; Jamaica, at one time headquarters of notorious buccaneers; Cristobal, Panama, famous for its fleet of Spanish treasure trains, now the site of the greatest canal in the world, and enchanting Nassau, in the Bahamas, returning to New York January 8, 1930.

We are all primarily conscious of the fact that this country measured by any of the yardsticks by which the prosperity of a nation can be gauged, is a very prosperous country, notwithstanding disturbed stock markets and a grain situation, both of which are, we hope, temporary," said E. W. Beatty, chairman and president of the Canadian Pacific Railway, at a dinner hosted to him in his honor by the St. Catharines Chamber of Commerce.

Robert Hume and George Thornton, veterans of many competitions, who teamed up from Manor, Saskatchewan, in the Canadian Pacific Swine Club competition for boys and girls, in the fall, have retired off the silver trophy and will join the teams from the western provinces for a trip to the Royal Winter Fair at Toronto as guests of the railway.

Blumino sand deposit of the McMurray district and along the Athabasca River will eventually furnish the large quantities of material required for waterproofing and surfacing the gravel roads of the western provinces, the opinion of Dr. C. O. Ommundsen, director of development for the Canadian Pacific Railway, Montreal.

Coldwood Golf Course, where the second annual Empress Hotel midwinter golf tournament will be staged in February next, is one of the finest links on the continent, decided Harry C. Hagen, an open golf champion, who recently played an exhibition game there. "It is a tricky course that calls for the best in a player and the park-like surroundings are ideal," he added.

George Johnson, son of Henry Johnson, locomotive engineer of 32 years' standing with the Canadian Pacific Railway, has been awarded a scholarship for five years at L'Ecole Polytechnique of Montreal, following his graduation last fall for entrance at that school. He is a resident of Three Rivers, Quebec. These scholarships have been offered since 1906, since which year 45 opportunities for free tuition have been offered by the railway.

Montreal with Pen and Pencil

428

One of the oldest, most picturesque and historic cities on this continent—the city of Montreal—has found a worthy biography in the work of Victor Morin and the well-known Canadian Author, Mrs. Simpson, who wrote them up, produced, under the auspices of the Canadian Pacific Railway, a description in words and drawings bearing the above title. Written originally in French it has been rendered into English in a translation that conserves the original verve and atmosphere of the book. In forty pages of clear and attractive type with fifteen full-page illustrations of pictures, the author has written a history of the city is told for the past three hundred years. Lay-out shows two contrasted and typical scenes: the famous church of Notre Dame, second largest on the continent; and Bonsecours market that resembles a scene taken from a city of Normandy.

Curlers!

A general meeting of the curling club will be held in the rink club room on Monday, Dec. 2, at 7:30 p.m. All curlers and intending curlers are invited.—W. L. Rippon, Sec.

Here and There

(418)

A ship of heroes skippered by one of them, will be the feature of the sailing of the Duchess of York on a recent trip from Montreal. Six holders of the Victoria Cross, Britain's most envied and most coveted military awards, were on the vessel, which was under the command of Captain Stuart, himself a V.C. They were on their way to Canada to London to take part in the dinner at the Prince of Wales to Victoria Cross men from all parts of the Empire slated to be held November 9. Other guests invited on Canadian Pacific liners Minnedosa and Empress of Scotland.

The stage is being rapidly set for one of the outstanding developments in Canada in a decade when the English Folk Dance and exponents of English folk dancing will hold their annual meeting at the Royal York Hotel, Toronto, November 13-18. A British opera by a British composer of world-wide fame will be produced at the Royal York. This is his first visit to Canada. "Hugh the Drover," by Dr. R. Vaughan Williams, is put on during the festival, and Canada and Canadians will be introduced to a whole new world of art and beauty.

"We are all primarily conscious of the fact that this country measured by any of the yardsticks by which the prosperity of a nation can be gauged, is a very prosperous country, notwithstanding disturbed stock markets and a grain situation, both of which are, we hope, temporary," said E. W. Beatty, chairman and president of the Canadian Pacific Railway, at a dinner hosted to him in his honor by the St. Catharines Chamber of Commerce.

Gift Suggestions

Palm Confectionery

Simons' Roosevelt Cigars in Xmas Boxes 75¢, \$2.75 and \$7.50. Dimples in Xmas Boxes .50¢ to \$5.00. Banquet Cigars, from per box .75¢ to \$6.75. Cigarettes wrapped in Fancy Christmas Boxes, all kinds. Chocolates in Fancy Christmas Boxes .50¢ and up. Vanity Chests. Looking Glass Cedar Chests. Campfire Marshmallows, per can .25¢. Xmas Fancy Candles, very best, per lb. .50¢. Fruits of all kinds, Nuts, Drisks, Candies, Ice Cream Bricks, etc.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude herbs. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the past years since its invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

WORLD HAPPENINGS BRIEFLY TOLD

Western Canada's visible wheat supply on November 15 of this year, showed an increase of more than twenty-five million bushels over that of a year ago.

The United States has notified Great Britain of its acceptance of January 21 as the date for the first meeting of the London naval conference.

Dr. Issai Sylvestre, said to be the oldest practising physician in Canada, died at his home in St. Quebec, at the age of 83. He had been practising medicine since 1867.

The trip to the British West Indies of their Excellencies, the Governor-General and Lady Willingdon, while designed primarily as a rest and holiday, assumes also the aspect of a good-will journey.

Miss May Thorneley, one of the best known temperance workers in Canada, is dead at the age of 71. She had been several times president of the Dominion Women's Christian Temperance Union.

The French government has sent its official acceptance to the invitation of the British government to participate in the five-power naval conference opening in London on January 21.

Leaders of the New Turkey have commenced to start observance of the Sabbath on the Christian Sunday instead of Friday, thus severing another of the ties which bind that nation to the Moslem world.

Honoring Dr. Augusta Stowe Gulden, the first woman to graduate in medicine from a Canadian University, the Medical Alumnae of the University of Toronto and other women physicians have had a portrait painted of her.

Meaning Of Totem Poles

Used By Indians As Monument Of Important Events

Boy Scouts and Girl Guides use the word totem without, perhaps, quite realizing its origin and meaning. Totem poles are used by many native tribes in various parts of the world as monuments of important events and tombstones of the dead. To the Alaskan Indians, however, the tribal totem stands for the animal ancestor from whom he believes his tribe is descended, and it is connected with all his religious and social beliefs.

Substitute For Tunnel

A vast double drum across the English Channel between Deal, England, and Calais, France, carrying two railway tracks, an automobile road and providing a ship channel, has been suggested by Jules Jaeger, Swiss engineer, as a substitute for the proposed underground channel tunnel.

Farmer (on the track of poultry thieves): "Now, you 'ear what I sez, Joe! If anything moves you shoot."

Joe (dragged into the business): "Aye—an' if anything shoots — I move!"

Hubby — "I've just paid the doctor the last money owed on his bill."

Wifey — "That's fine, dear. Now the baby's ours."

Catarrh

Heat and inhale Minard's. Excellent for colds in head, throat and chest.

New Medical Arts Building

According to a notice of incorporating in the Alberta Gazette, a new Medical Arts Building is to be erected in the Alberta capital at a cost of about \$125,000.

A perfect violin made by a Peterborough, Ontario, artist, is 4 in. long, weighs a quarter of an ounce, and has ninety-nine separate parts.

May Export Gas To United States

Alternative Proposition Is To Convey Surplus Gas From Alberta To Saskatchewan Points

While the special federal commission investigating the problem of disposing of the enormous surplus of Turner Valley natural gas has not yet reported, intimations are being broadcast that the report will favor export of the surplus to United States points south of the international border in Montana.

If the commission reports to that effect, there is sure to be an outcry from cities in Saskatchewan which are looking anxiously for a supply of natural gas from over the Alberta border.

The nearest market on the American side of the line is Great Falls, Montana, some 100 miles south of the end of the natural gas line from Calgary to Bow Island. Oil companies and gas companies producing natural gas who wish to market it argue that this is much closer than any possible market in Saskatchewan.

On the other hand, it is known that the British interests are driving for gas from Cypress Hills on the Alberta-Saskatchewan border. Already one big flow has been struck there. If sufficient field is uncovered it is the intent of Roth and his associates to construct a 300-mile pipe line to Swift Current, Moose Jaw and Regina. This is not an excessive distance as the total mileage of the Calgary-Turner Valley-Bow Island system is already more than 200 miles.

Another factor is that if the gas lines were constructed from Cypress Hills to Moose Jaw and Regina, the Turner Valley surplus could then easily be used as another link of only about 40 miles between Cypress Hills and Foremost would tie it in the proposed Saskatchewan gas distribution system with the existing Alberta system. Even though the pipeline might be somewhat more than the cost of exporting gas to Montana, it would mean that the immense Canadian natural resource of natural gas would be enjoyed by Canadians.

Big Mineral Discovery

Deposit Of Copper And Nickel Ore Attracting Attention To Saskatchewan

The whisper of a great discovery has gone all across the Canadian west and the representatives of mining organizations large and small are endeavoring to ascertain the spot in northern Saskatchewan where the Dominion Explorers, Ltd., are reported to have made what appears to be the mineral discovery of the current year.

Members of the Dominion Explorers Organization have been brought from different areas and have been flying away in one fixed direction, and the indications are the discoverers will have themselves all fortified in regard to holdings in the new district before rival claim-stakers may appear.

Dominion Explorers being a Lindsay organization, had had the experience of dealing with similar discoveries.

Sherritt-Gordon has been a case in point where the mineral bearing fractures extend possibly two to three miles in length. In regard to the new discovery in northern Saskatchewan, while officials have remained reticent, yet the size of the organization has rendered it difficult to prevent a certain amount of detail filtering out. Outstanding features now definitely known are the 90' width of the deposit and the particularly great length—the surface being a close duplicate of Sherritt-Gordon—with the exception that whereas Sherritt-Gordon is copper and zinc, the deposit located by Dominion Explorers is copper and nickel.

Samples of the ore from the new discovery have been examined. These samples having been taken from the surface where gossans are heavy and where rock has not yet reached entirely below the leached zone are extremely impressive and something which would justify the discoverers in rounding out for themselves a holding of at least 15 to 20 square miles.

Pilchard Oil Shipments

Shipments of pilchard oil from the west coast of Vancouver Island are increasing yearly. One vessel recently took 650 tons in bulk destined for Europe, where margarine is still a staple diet. Sometimes whale oil is used as a substitute for pilchard oil in the manufacture of margarine.

Deer Park, near Copenhagen, consisting of 4,200 acres, is the largest park in the world.

Perfumes first were employed only in religious services.

If love is blind, jealousy is an eye-opener.

Nearly one-eighth of the surface of Sweden is covered with lakes.

SUNDAY SCHOOL LESSON

December 1

THE CHRISTIAN HOME IN A MODERN WORLD

Golden Text: "Honor thy father and mother." Ephesians 6:1-3; Matthew: Deuteronomy 5:16; Luke 2:40-42; 24:26-32; Ephesians 6:1-9; 2 Timothy 1:3-5; 3:14-15.

Explanations and Comments

The Development of the Boy Jesus, verse 40-41. In every one of us ever lived, Jesus entered the world as a helpless infant, and like all normal children, His powers developed gradually. As a child grows, he becomes more and more wise with wisdom, and the grace of God was upon Him.

"That I may grow!" What though Time cuts furrows in my face, My spirit may ever add grace unto grace, Graces with added days still keep me pace.

"O that I may grow!" — Malthe D. Babcock

Jesus At Twelve Years Of Age, verses 41-50.—When Jesus took twelve years of age his parents took Him to Jerusalem for the first time to attend the Passover.

He came alone (verses 41, 42 and 43). He was offered to as the parent, or father, of Jesus. Dr. Garvin explains that "Joseph is the father of Jesus, one Jesus parents for him provided and protected him, filled a parent's place, and played a parent's part. To him also God gave the title of Father." The Passover began on the fifteenth of Nisan, the first month, and lasted several days. It was a journey of eighty miles from Nazareth, their home in Lower Galilee, to Jerusalem.

When Joseph and Mary started home again, the Boy, unknown to them, tarried behind in Jerusalem. They were on a long journey towards Nazareth when they missed Him, for they had supposed Him with kinsfolk or acquaintances in the same town. They continued in company of many others returning to Nazareth and nearby towns, the boys and young men probably walking together in groups, and older ones by themselves, many of whom were riding mules. "I question whether there is ever a pilgrimage from Jerusalem to the Jordan presented by without separation of children and parents equally prolonged!" — Thompson.

They spent part of one day hunting for Him, and the next day going back to Jerusalem, on the third day they found Him in the temple, listening to the teachers and asking them questions so deep that all were astounded and amazed.

"Son, why hast Thou thus dealt with us?" his mother questioned. "Thy father and I sought thee sorrowfully. How is it that thou sought Me?" asked Jesus, surprised that they did not know where to find Him. "Knew ye not that I must be about my Father's business?"

Most people are caused by aches, pains, and other things, is unnecessary.

If it kills toes, it must have a harmful effect on the health of citizens, who are, after all, almost as valuable. We are not "picking on" the airplane in particular; it is no worse than a dozen other noise-makers.

The outcome of the case will be watched with interest, because if the racket of airplanes kills foxes and their owners are suing an airplane company for damages.

The outcome of the case will be watched with interest, because if the racket of airplanes kills foxes and their owners are suing an airplane company for damages.

Human beings are going to start collecting damages for nervous injuries caused by various modern noises.

Most people are caused by aches, pains, and other things, is unnecessary.

If it kills toes, it must have a harmful effect on the health of citizens, who are, after all, almost as valuable. We are not "picking on" the airplane in particular; it is no worse than a dozen other noise-makers.

Some time or other, civilization must tackle the nois problem — and solve it. Just now seems as good a time as any to start —Vancouver Sun.

Alberta Turkeys

High standards for turkeys are being maintained by the Alberta Bronze Turkey Association. It was reported at a meeting of the Association in Calgary the other day. The average weight of turkeys before the advent of the Association was 10 pounds. Now it is 12 pounds.

New Kind Of Frog

Have you ever heard of "estimating frogs"? Well, Captain Jenkins, well known Australian naturalist, says there are such animals in his country. These "estimating frogs" he says know when to expect droughts and they prepare by drinking enough water to outlast a dry season.

The Trans-Siberian railroad is 1,078 miles long.

Nearly one-eighth of the surface of Sweden is covered with lakes.

mas Letters, Into 100 Homes, All For
One Dollar. For Better Health In
Manitoba. Set the Christmas Bells
A-Ringing.

Carrie In Death

Friends Of Famous Singer Will
Change Clothing On Embalmed
Body Every Three Years

His wife will see an immaculate
Carrie even in death.

The famous singer's friends decided to open his casket every three years and change the clothing, keeping his remains constantly dressed in the latest fashions as long as the embalming maintains the perfect state of the body.

The plan was revealed in Paris by Tito Chippa, noted tenor.

Ever since his death, in 1921, the body of Carrie has rested in a crypt in Canessa tomb so that visitors may view it through the covering of the casket.

The Power Of Softness

Snow Bank Would Stop Bullet Which
Would Penetrate Solid Substance

A bank of snow six feet thick will stop a bullet shot at the distance of fifty yards. The bullet will not penetrate that down bank of snow, but it will go through the solid embankment when fired at three times the distance. The bullet shatters the steel, penetrates the solid bank; but the soft feathered snow has a way all its own, and it takes in that murderous lead and loves it, and as it were, soothes it.

Photos From Great Height

A new radio picture balloon which international meteorologists' polar expedition will take photographs from a height of about 12 miles will be utilized by the international meteorologists' polar expedition scheduled for 1932 and 1933. The photographs, taken automatically, will immediately be visible on the earth, it was stated.

New Airplane Propeller

Development of a reversible airplane propeller is tending to prevent nosing over in landing and said to eliminate the ground loop menace, has been announced by the Ritchie-O'Neil Company. The new propeller weighs 30 pounds more than one of the standard type.

The pouch of the pelican is used as a scoop or dipper for fishing.

The best way to make a peach cordial is to take her out to dinner.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrel, the cigarette girl, but he doesn't know it. He makes only a living, has bad singer, and wife, fans, as a composer of popular songs. When their baby, Junior, is about two years old, Molly, comes with John Peeler, Al's best friend, to New York to take the child Al adores and sail for France. Al, completely broken by the loss, disappears from Broadway and becomes a despatch boy. One day Grace Farrel sees him on the street, but he runs away. Grace starts a search for him, which ends in failure, but the image of Grace remains vividly in Al's mind.

CHAPTER XXII.

Something of Al's old generous spirit toward Grace returned as he thought of her. How concerned her expression had been yesterday as she stared at him from across the street. Yet his feeling toward her was not strong enough to overcome the resistance of his desire to separate himself from the old life.

In spite of all that, however, the memory of her face remained in his mind. Perhaps it was this memory that brought him up sharply about three o'clock one morning before a house that seemed strangely familiar. Surely he knew these outside steps and that entrance. It was Blackie Joe's place.

Slowly, scarcely knowing what he was doing, Al mounted the shabby stairs toward the little gleam of light saw at the top. Yes, he was sure of the place now; an intense longing possessed him to see the inside of the old familiar place where he had won his earliest triumphs. Only a few years had passed since those happy-go-lucky nights, but the time seemed like a century.

He stopped before the heavy, bolted door. It was a new door, much stronger than the one Al had known. The many raids of the prohibition agents had forced Blackie to take additional precautions; his place was better guarded now.

Al knocked against the panel set high in the door and presently it opened. A strange face gazed at him, and the eyes became more suspicious every moment, as though his owner looked him up and down, noting his dilapidated clothes.

"Is Blackie Joe here?"

"Who wants to know?" asked the guard curiously.

"I do. I know him."

There was a pause, then: "Gwan, beat it! He's got no time for the likes of you!"

The panel closed with a snap. Al, nodding listlessly, began to descend the stairs. He shrugged his shoulders—it didn't matter.

Inside, Blackie had been standing fairly near the door. "Who wants

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vanessa, Ont.—"I think Lydia E. Pinkham's Vegetable Compound has helped me. I have had six children of which four are living and my youngest baby boy is now eight months old who weighs 23 pounds. I have had you sing to your child before each of them was born and have certainly recommended it to all my friends. I am sure they will receive the same help I did."—Mrs. MITTON MC-MILLAN, Vanessa, Ontario.

W. N. U.—1813

Blackie. This was just the shell of the old Al; Blackie felt how strong that apparently listless resistance of his would be to any come-back. Nevertheless, he leaned forward and said earnestly,

"Al, you don't have to tell me how you feel—I know. It may seem strange to you, but I was knocked out once myself, but in the same way, by a woman. For a while I thought there were no other lives, then the day came when some gave me a good stiff talking to. I decided to fight my way up again, and I did. I decided I wouldn't let one blow put me down for the count!"

"Blackie, the reformer," murmured Al. An expression somewhere between a smile and a sneer curved the corners of his mouth.

Blackie leaned back in his chair, hurt, but determined not to show it. In the old days Al could never have made a sardonic and bitter rejoinder like that.

"Do you still love Molly?" Blackie asked incredulously.

"No!" The sharp denial was the first sound of life Al had shown. Blackie nodded in approval. Then Al seemed to think that some further explanation was needed. "She'd do for me and first I had to clean her out of my mind. I did that—then I tried to write. But I found I couldn't get interested. It was no use."

Just then a water stuck his head in the door and told Blackie a customer wanted to speak to him at Blackie's house.

"Excuse me a minute, Al. Make yourself at home—I'll be right back."

(To Be Continued.)

BABY'S OWN TABLETS A HELP TO MOTHERS

There is no other medicine of as great a help to young mothers as Baby's Own Tablets. These Tablets are a cure, but through laxative and cathartic properties, a relief to the stomach; correct constipation and indigestion; break up colds and simple fevers and make the cutting of the umbilical cord easier.

Mothers who keep a box of tablets in the house always feel safe from the sudden attack of illness that seize them little ones. Baby's Own Tablets are given on the first signs of illness; the baby will soon be right again. Concerning the Tablets Mrs. R. C. Carver, Lynden, I. O. writes: "I have used Baby's Own Tablets in the house and find them a wonderful help in keeping my baby well."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Workers Helped By Science

One Detector Located New Body and Furnished Work for Discharged Miners

The practical ways in which science helps working people is demonstrated again in England. A lead mine in Derbyshire had "petered out." Two young schoolmasters invented an ore detector, just about the time a hundred miners had been discharged. With the detector they located a new lead-ore body, 1,000 feet under the surface. They figured it was worth about \$250,000. The mine owners, having faith in science, put the miners back to work again, located the ore body through a tunnel and now the mine is working full blast. Pioneers continually promise miracles to help working folk. Science performs the miracles.—Vancouver Sun.

Some Human Ostriches

People Have Earned Living By Swallowing All Kinds Of Articles

There are on record amazing feats of people who can swallow almost anything with absolute impunity, who glory in it, make a mania of it, and some who even earn a livelihood by it.

A Stratford, England, telegraph operator died some years ago in the Essex County Lunatic Asylum from asphyxia. He had swallowed stones, grass, leaves, wood, and scrap-iron.

Even more voracious is the individual who died at the London Hospital at a later date, and who gloried in the title of "The Champion Ostrich."

He had in him forty pieces of cork, thirteen pieces of tin foil, nine pennies, one iron ring, three pieces of leather, a leather strap, 8 inches long, 12 inches of string, with bits of iron attached, and an immense quantity of odd lengths of string, cotton, and paper.

Another human ostrich made his stomach a veritable dust-bin by consuming over two pounds of broken lamp chimneys, nails, tacks, screws, and timbers.

Could Well Believe It

An old lady, up from the country, stood in a hasty thoroughfare, looking at the ceaseless stream of traffic, then at the notice, "Pedestrians cross here."

"Humph!" she was heard to mutter; "and I shouldn't blame 'em if they were downright angry."

She: "What would you do if I should cry?"

He: "Hang out a sign, 'Wet Paint'."

Old Eskimo Culture

Thousands Of Wonderful Specimens Found In Northern Alaska

Another chapter in present-day knowledge of the "golden age" of Eskimo culture, more than a thousand years old but newly discovered, has been added by Henry B. Collins, Jr., Smithsonian scientist, on his return from a five-month exploration of Northern Alaska. Buried in an artificial "mess" of refuse, but up to 20 feet in the centuries of existence of a thriving village in the south east and of St. Lawrence Island, he found rich material of the most ancient and highly developed Eskimo culture known.

Thousands of specimens of ivory and bone implements, weapons, ornaments, pottery, and wooden artifacts were also found. Centuries ago a village had been reared on the flat tundra of the beach, he said, as kitchen refuse accumulated, old dwellings were abandoned and new ones raised on the artificial foundation. How long the process kept up no one knows. The "mess," now frozen solidly for its total depth, grew higher still, in 1878 and 1879, famine and epidemic wiped out the native population.

Through the 20-foot layer the scientist traced the old culture, an art discovered in 1926 by Dr. Ales Hrdlicka, now Smithsonian anthropologist, and Diamond Jenness, of the National Museum of Canada.

Implements and ornaments are distinguished by graceful, sweeping lines of decoration, an art that makes modern Eskimo work mechanical in comparison. Some objects are so old that their use is unknown to the present-day native. "It is a peculiar and rich culture," Collings said. "Strange because the farther back we drive, the richer it gets. Modern Eskimo art, in contrast, is in a degenerated state. The ancient materials suggest strongly that the original home of all Eskimo culture lies in the west, in Alaska or northeastern Siberia. The culture is distinctly older than the oldest found in Canada and Greenland, a significant fact. "We are after the ultimate origin of the art," he said. "There is no explanation for its fading out, except perhaps the introduction of the use of iron, with which the later and more mechanical ornamentation has been fashioned."

Using Steam From Volcano

Steam Issuing from fissures in the earth near the main crater of Mount Etna will be used this winter to supply the central heating plant of the volcanological observatory on the higher slopes of the mountain. Professor Gaetano Ponte, director of the Etna Observatory, said.

Long Lived War Leaders

Four Who bore Heavy Burdens Have Become Octogenarians

For months before his death Stresemann was a man broken in health, anxiously watched by relatives, friends and physicians, kept to a rigid diet, sent to bed early—he was an invalid, indeed, ere he had reached his fiftieth birthday. Hindenburg, on the other hand, celebrated his eighty-second birthday, which fell on the day before his death, drowsy, by going on a hunting trip, which was cut short by the Minister's death.

Ten years of peace killed Gustav Stresemann; three years, one of which was the supreme leader on one side—had proved insufficient to lay Paul von Hindenburg low. Can it be that we have heard far too much about the horrors of war, far too little about those of peace? It would seem so—at least so far as the longevity of war leaders is concerned.

Today, fifteen years after the outbreak of the World War, and eleven years since its close, there are four men who can proudly boast that, despite having borne heavy burdens of leadership between 1914 and 1918, they have nevertheless become octogenarians. Hindenburg is one—of the others, two are military men, Joffre and Mackensen—and the other a civilian who was at the head of his country's war-time government at a time of acute crisis—Georges Clemenceau.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions prevail. If you will not rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities favorably, driving the worm conditions favorable to the health away. The child will disappear, and the child will have no more suffering from that cause.

Stop Falling Hair with Minard's Liniment

Many a grafter has built a fortune on a steel foundation.

Children's Colds

Best Treated Externally

That's why modern mothers prefer Vicks—it cannot upset delicate stomachs. Rubbed on throat and chest, it acts two ways at once:

(1) Its healing vapors, released by the body heat, are inhaled direct to the air passages;

(2) It "draws out" the soreness like an old-fashioned poultice.

acts 2 ways at once

Mrs. F. G. Graham Passed Away Friday

Community Mourns Death of Old-Time Resident--Many Attend Funeral Service to Pay Respect--Laid to Rest at Blairmore.

There was not a soul in the community but who heard the news of the death of Mrs Frank G. Graham with profound regret and sympathy for the bereaved husband and family. It came as a bolt from the blue when her death was made known at 1 o'clock on Friday last. Affectionately known among her intimate friends of long standing in the community as "Ma," she had, by her kindly manner in her private life, and in her contact with the public at the post office, gained a strong hold on the affections of the people, which was demonstrated in the flood of messages of sympathy from all sections in the Crown's Nest Pass.

It was only on the Tuesday evening previous that she had returned from Nelson, B.C., where she had been nursing her aged father, Mr. Maltby, and on arrival disappeared to be in her usual good health and spirits, and met the members of her family at the train in happy mood and pleased to be home again.

Early on Thursday morning she was taken ill, and lapsed into unconsciousness, from which she did not recover, and passed away peacefully at 12:45 on Friday afternoon.

Her maiden name was Mary Edith Maltby, and her birthplace was Newcastle, Mirimachi, New Brunswick, being born on June 30, 1872. She was married at Newcastle, N.B., on Dec. 26, 1893. In 1895 Mr. Graham came west to Nelson, B.C., Mrs. Graham following shortly after. In 1902 they moved to Frank, and lived there till the famous slide occurred, following which they moved to Blairmore. After a year's residence there they moved to Coleman, in the spring of 1904, at which time the town was beginning to take shape, so that they have seen it grow from its infancy and have shared its prosperity and its setbacks.

St. Alban's church owes a great deal to the faithful work of Mrs. Graham. The handsome pews, seats for the choir, the bishop's chair and the font, are a tribute to her energy, for in the earlier days of the church's history she organized a willing band of girls under the Junior W.A. and from their efforts in various ways the funds were raised for the furnishings. The late Bishop Pinkham on his visits to Coleman always availed himself of the hospitality of the Graham home, and Mrs. Graham would refer to his visits with pride and affection. And the same hospitality was accorded to the new comer, and among the foreign born population, she was regarded with the same esteem as among those of her own race.

The funeral was held on Sunday afternoon at St. Alban's church, preceded by a short service at the home by the ladies of Minerva Chapter, O.E.S., conducted by Mrs. A. F. Short, worthy matron. The service at the church was choral, to which many were unable to gain admittance. The rector, Rev. A. D. Currie, officiated. The casket was borne by five sons, and her only brother, H. L. Maltby, of Lethbridge.

At the conclusion of the church service the funeral party proceeded to Blairmore, followed by a long string of cars conveying sympathizers from all parts of the Pass. The remains were laid to rest in the family plot in the cemetery there, the committal service being read by the rector.

The surviving members of the family besides her husband are: A. E. Graham, Coleman; C. M. Graham, Lacomber; F. H. Graham, Coleman; J. H. Graham, Edmonton;

tou; G. H. Graham, Coleman; Mrs. S. Maclellan (Dorothy) Coleman. Those attending from a distance included Mr. and Mrs. H. L. Maltby of Lethbridge; W. H. Houston, of Nelson, B.C. (brother-in-law) W. V. Prior of Macleod, and Alex. Easton, of Graman. Mrs. Charles Graham and children of Lacomber, came with her husband for the funeral.

Mrs. A. M. Morrison has been seriously ill during the past week, Nurse Archer being in attendance.

Rev. A. D. Currie is attending a Diocesan executive meeting in Calgary this week.
